

Technical workshop TW 1

Survey of International Dam Safety Risk Approaches and Practices

Friday, July 7, 09:00 – 12:30, Hall Aquarius+Taurus

Designated organizer: David S. Bowles
 Managing Principal, RAC Engineers and Economists, LLC
 David_S_Bowles@hotmail.com

Purpose:

To provide an opportunity to hear first-hand from country representatives regarding dam safety risk analysis practices and risk approaches currently being used in their country. An overview of these international practices would provide attendees an opportunity to hear from each country representative about their risk practices and evaluate which approaches might work best for their situation.

Final Agenda

9:00	-	9:01	Opening Comments	Moderator
